Supplemental Figure 1. Kaplan-Meier plot of EFS (**A**) and OS (**B**) obtained by stratifying the 41 stage 4 NB patients according to mRNA expression levels of *IL10*, *FOXP3*, *ARG1* and *CD163* in BM samples above (dotted line) or below (continuous line) median values. Y-axes represent % of event-free or alive patients, respectively. X-axes represent time of survival (months).

Supplemental Figure 2. Kaplan-Meier plot of EFS (**A**) and OS (**B**) obtained by stratifying the 41 stage 4 NB patients according to mRNA expression levels of *IL10*, *FOXP3*, *ARG1* and *CD163* in PB samples above (dotted line) or below (continuous line) median values. Y-axes represent % of event-free or alive patients, respectively. X-axes represent time of survival (months).
