

## **Supplementary Materials**

**Supplementary Table 1:** Background of AS patients in each study.

**Supplementary Figure 1:** Forest plot of the overall meta-analysis of regulatory T cell (Treg) proportions in peripheral blood (PB), identified as single CD25-positive, between ankylosing spondylitis (AS) patients and healthy blood donors (HD).

**Supplementary Figure 2:** Forest plot of the overall meta-analysis of regulatory T cell (Treg) proportions in peripheral blood (PB), identified with FOXP3-positive, between ankylosing spondylitis (AS) patients and healthy blood donors (HD).

**Supplementary Figure 3:** Forest plot of the overall meta-analysis of regulatory T cell (Treg) proportions in peripheral blood (PB), identified with CD127-negative, between ankylosing spondylitis (AS) patients and healthy blood donors (HD).

Supplementary Table 1: Background of AS patients in each study.
