

Figure S1: PerC CXCL1 levels (a), *Cxcr2* (b), *Ccl2* (c) and *Mx1* (d) gene expression in peritoneal infiltrating leukocytes of HIII and LIII mice injected with pristane. Mice were injected with pristane (TMPD) or saline (CTRL) and peritoneal lavage fluid was harvested after 7 (a-b), 7 and 35 (c) or 35 and 120 days. Bars represent mean \pm 95% confidence interval of 1-3 experiments with 4-6 animals/group (two-way ANOVA followed by Bonferroni post-tests). * $p < 0,05$; ** $p < 0,01$; *** $p < 0,001$.
