

Supplementary Materials

Figure S1: Sensitivity analysis and publication bias. (a) Sensitivity analysis of the association between SNHG15 expression and recurrence-free survival (RFS). (b) Begg's funnel plot of publication bias for RFS.

CERTIFICATE OF ENGLISH EDITING

This document certifies that the paper listed below has been edited to ensure that the language is clear and free of errors. The logical presentation of ideas and the structure of the paper were also checked during the editing process. The edit was performed by professional editors at Editage, a division of Cactus Communications. The intent of the author's message was not altered in any way during the editing process. The quality of the edit has been guaranteed, with the assumption that our suggested changes have been accepted and have not been further altered without the knowledge of our editors.

TITLE OF THE PAPER

High expression of the long non-coding RNA SNHG15 in cancer tissues samples predicts an unfavorable prognosis of cancer patients: A meta-analysis
