

Supplementary Figure 1. Boxplots showing the concentrations of T cell development promoting cytokine IL-15, the T_h2 cytokine IL-13, the T_h17 cytokine IL-1R α and the T_h17 cell development promoting cytokine IL-1 β in aqueous humor of patients with pOT, rOT and the control group ($n=62$).

Supplementary Figure 2. Boxplots demonstrating the concentrations of the chemokines MIP-1 α and MIP-1 β , the growth factors GM-CSF and G-CSF in aqueous humor of patients with pOT, rOT and the control group (n=62).

Supplementary Figure 3. Boxplots showing the concentrations of the chemokines PDGF-bb and Rantes, the growth factor MCP-1 and angiogenetic factor VEGF in aqueous humor of patients with pOT, rOT and the control group (n=62).
