In the article titled “Sex-Specific Negative Association between Iron Intake and Cellular Aging Markers: Mediation Models Involving TNFα” [1], there were errors in Figures 4 and 5 and in Authors’ Contributions.

Figure 4(a) should show “1.535” instead of “-1.535” and “-0.018” instead of “0.018.” The corrected figure is shown below and listed as Figure 1.

Figure 5 should show “1.920” instead of “-0.1920” and “3.044” instead of “-3.044,” and the caption should state “In Figure 5” instead of “In Figure 4.” The corrected figure and corrected caption are shown below and listed as Figure 2.

There was an error in Authors’ Contributions, where some of the contributions were listed incorrectly. The corrected section appears below:
JY is responsible for the data acquisition, analysis and interpretation of the data, and drafting of the manuscript; HBL, PPL, FP, and WL worked on project administration; SLH is assigned to the investigation and software; HBZ is responsible for the funding acquisition and project administration; CXM, QS, MLM, YWL, and LL did the investigation; LLX and YXL are assigned to the study concept and design, critical revision of the manuscript for important intellectual content, and study supervision. All authors have read and approved the manuscript for publication.

The errors were introduced during the production process of the article, and Hindawi apologises for causing these errors in the article.
