

A**B**

Fig. S2. Down regulation of AMPK did not rescue motor deficits of PINK1^{B9} flies. (A) Relative AMPK mRNA expression in each group. (n≥5/group) (B) Climbing ability examined in each group. (n≥100/group) Values were expressed as mean ± S.D. (**P<0.01, ****P<0.0001, ns=not significant).
