

Figure S1. Violin plots of mRNAasi in TCGA LGG patients classified by (A) ATRX and (B) TERT mutation. Differential analysis between the LGG groups were estimated by the Student's t-test.

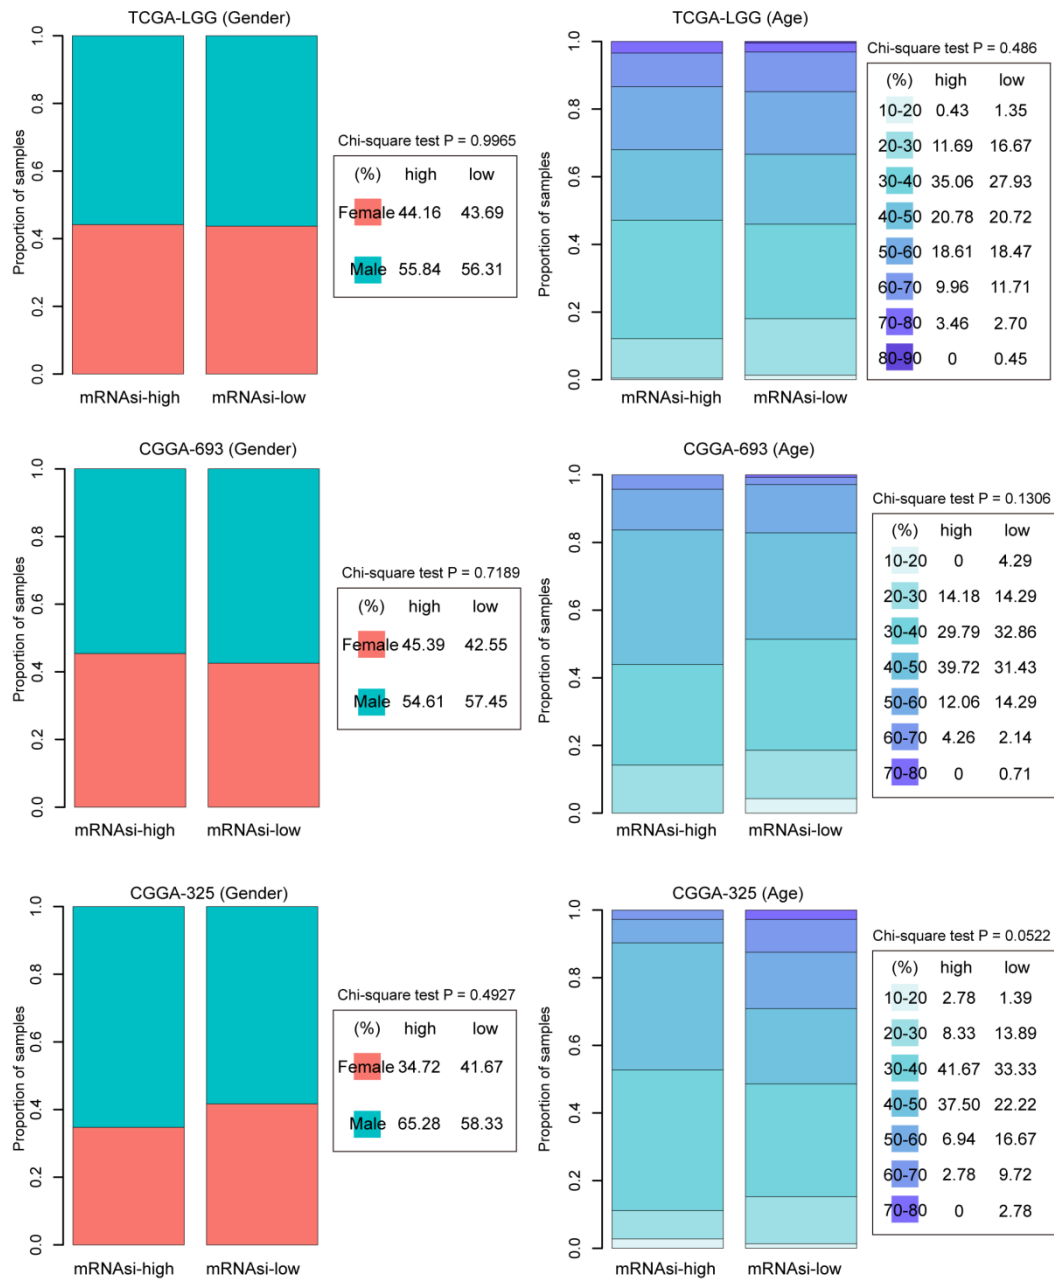

Figure S2. Gender and age distributions between mRNAi-high and mRNAi low groups in TCGA-LGG, CGGA-693, and CGGA-325 datasets.

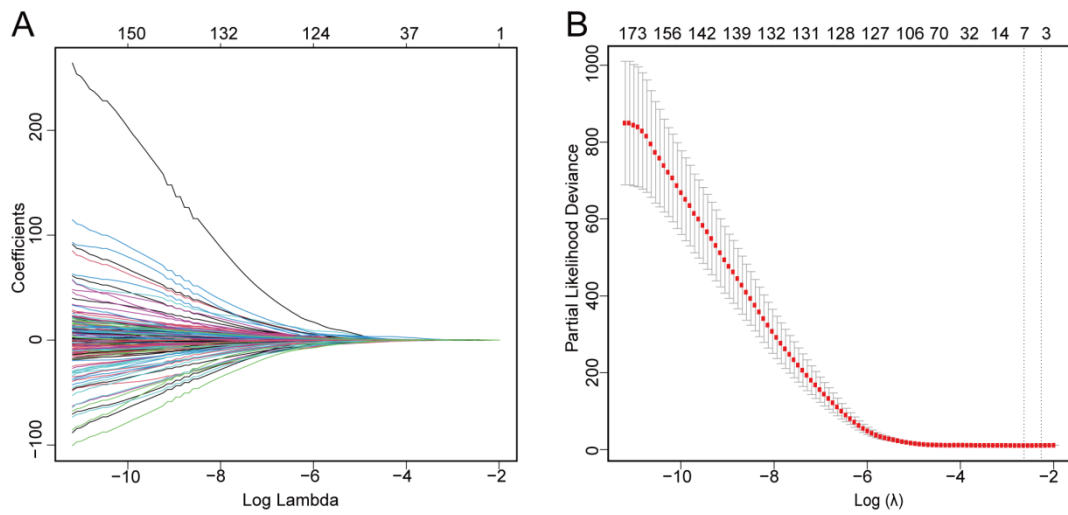

Figure S3. The least absolute shrinkage and selection operator Cox (LASSO-Cox) analysis for m6A-related lncRNAs. (A) The coefficients for m6A-related lncRNAs. (B) The best parameter (λ) was selected based on the LASSO model.

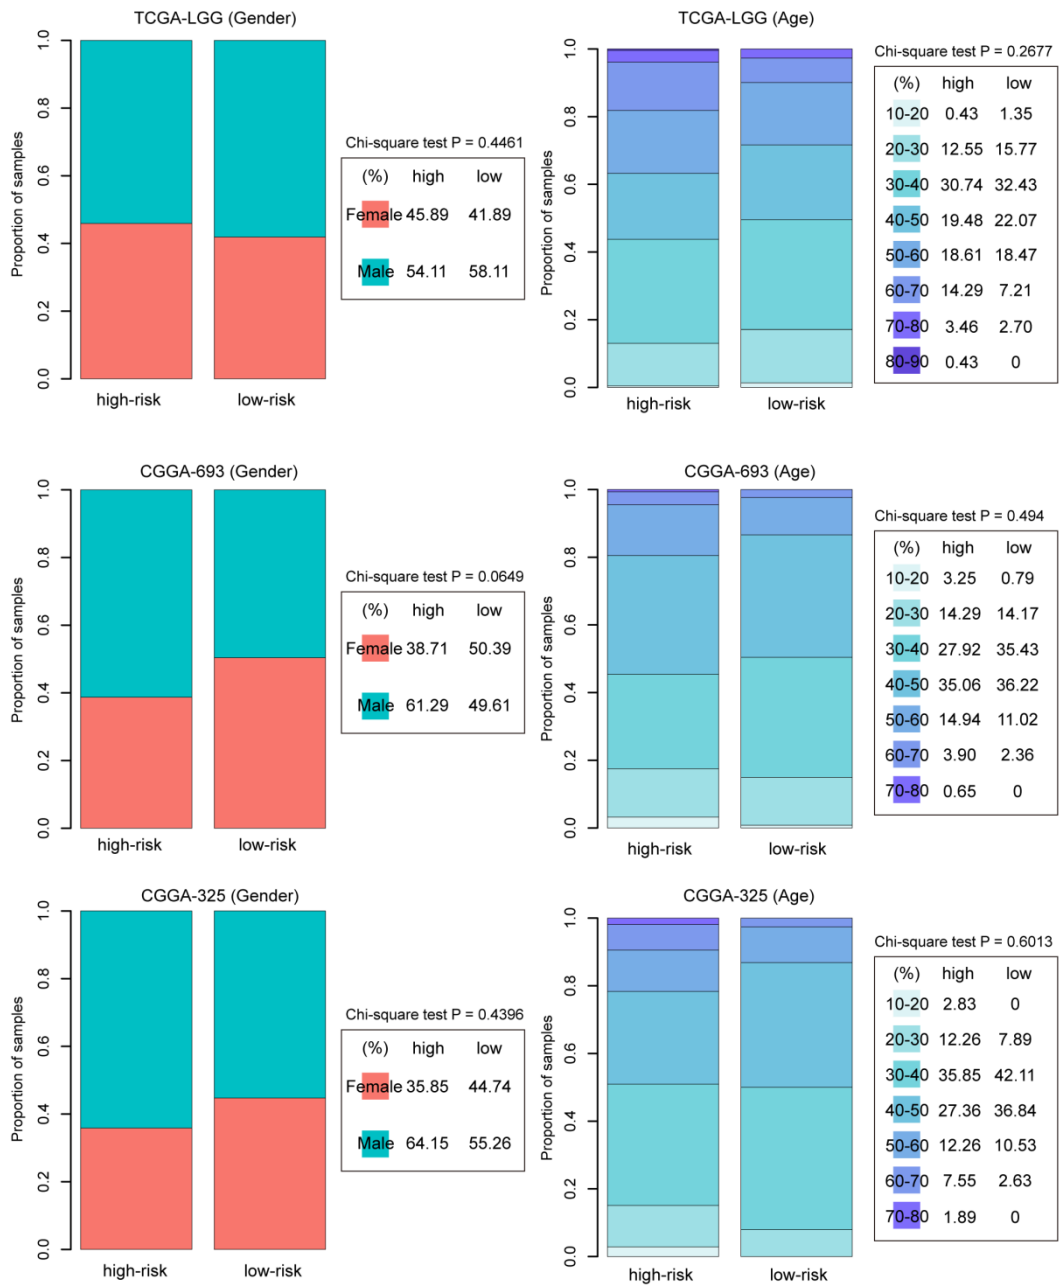

Figure S4. Gender and age distributions between high-risk and low-risk groups in TCGA-LGG, CGGA-693, and CGGA-325 datasets.

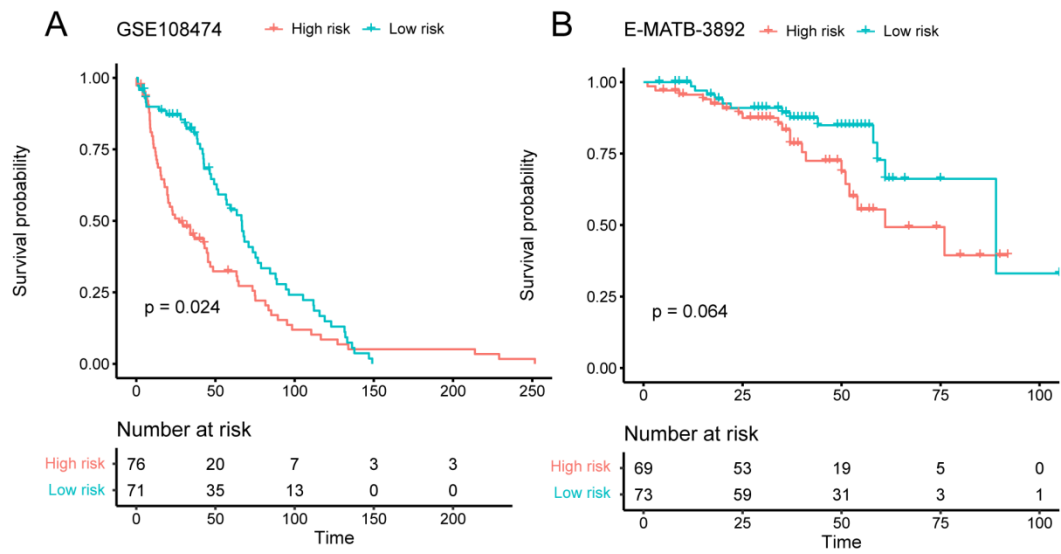

Figure S5. The performance of risk model in (A) GSE108471 and (B) E-MATB-3892 cohorts.

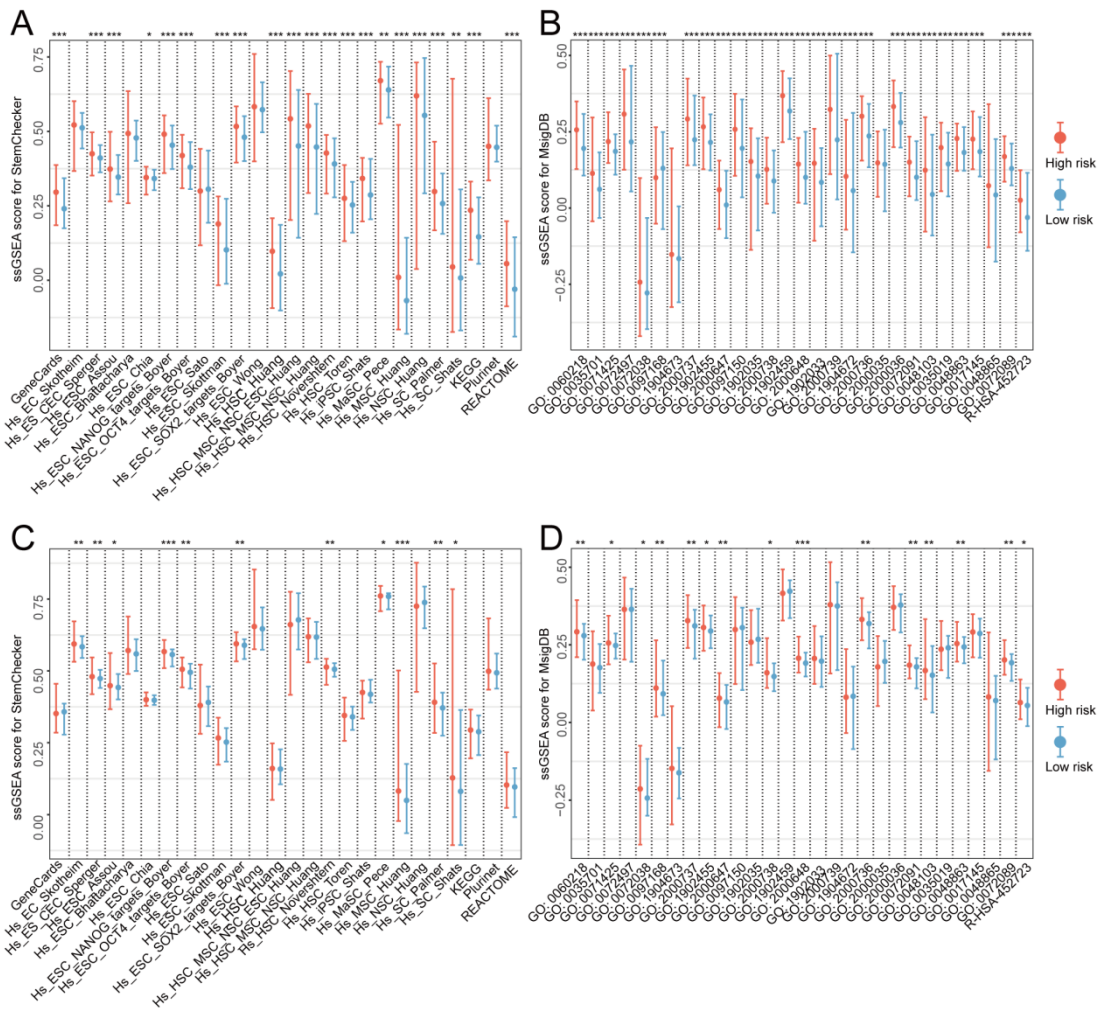

Figure S6. The differences in stemness scores between high- and low-risk groups of LGG patients. (A) and (B) Box plots showing the activities of StemChecker and MsigDB stemness categories estimated by ssGSEA in CGGA-693 risk groups. (C) and (D) Box plots showing the activities of StemChecker and MsigDB stemness categories estimated by ssGSEA in CGGA-325 risk groups. *: $p < 0.05$, **: $p < 0.01$, ***: $p < 0.001$ 0.001, and ns for no significant.

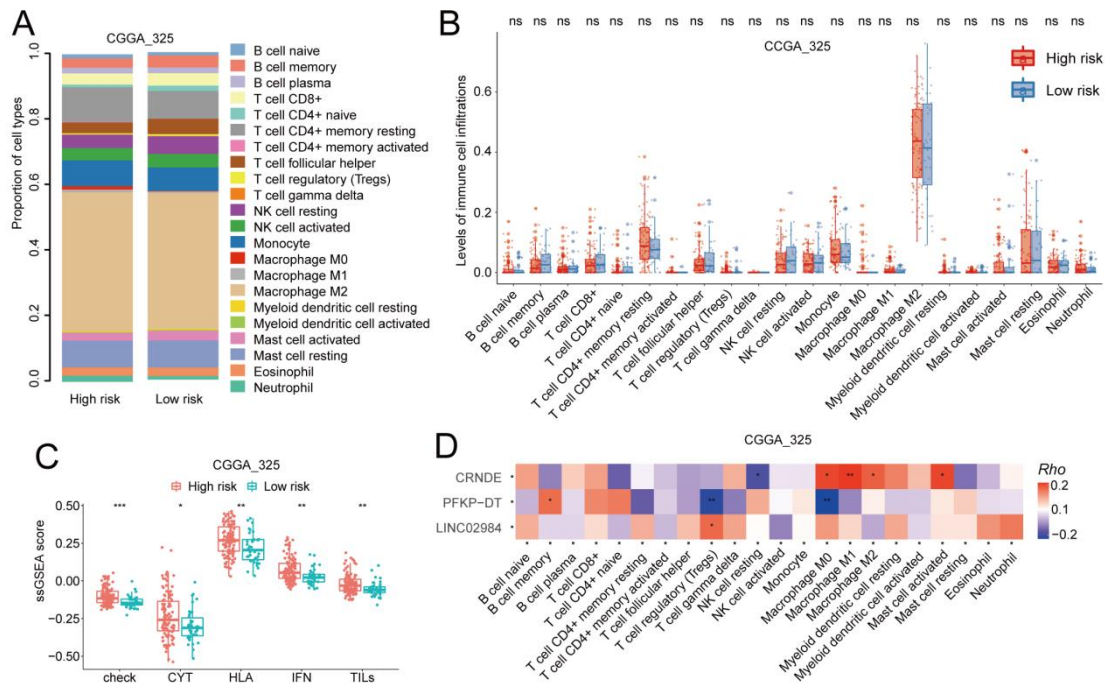

Figure S7. The TIME pattern and immune signatures of CGGA-325 risk groups. (A) Bar plots showing the proportion of immune cells in each LGG risk group. (B) Box plots showing the levels of 22 immune cell infiltrations between high- and low-risk groups. (C) The differences of immune signature activities estimated by ssGSEA between LGG risk groups. (D) The correlation between lncRNA expression and immune cell infiltrations. *: $p < 0.05$, **: $p < 0.01$, ***: $p < 0.001$, and ns for no significant.

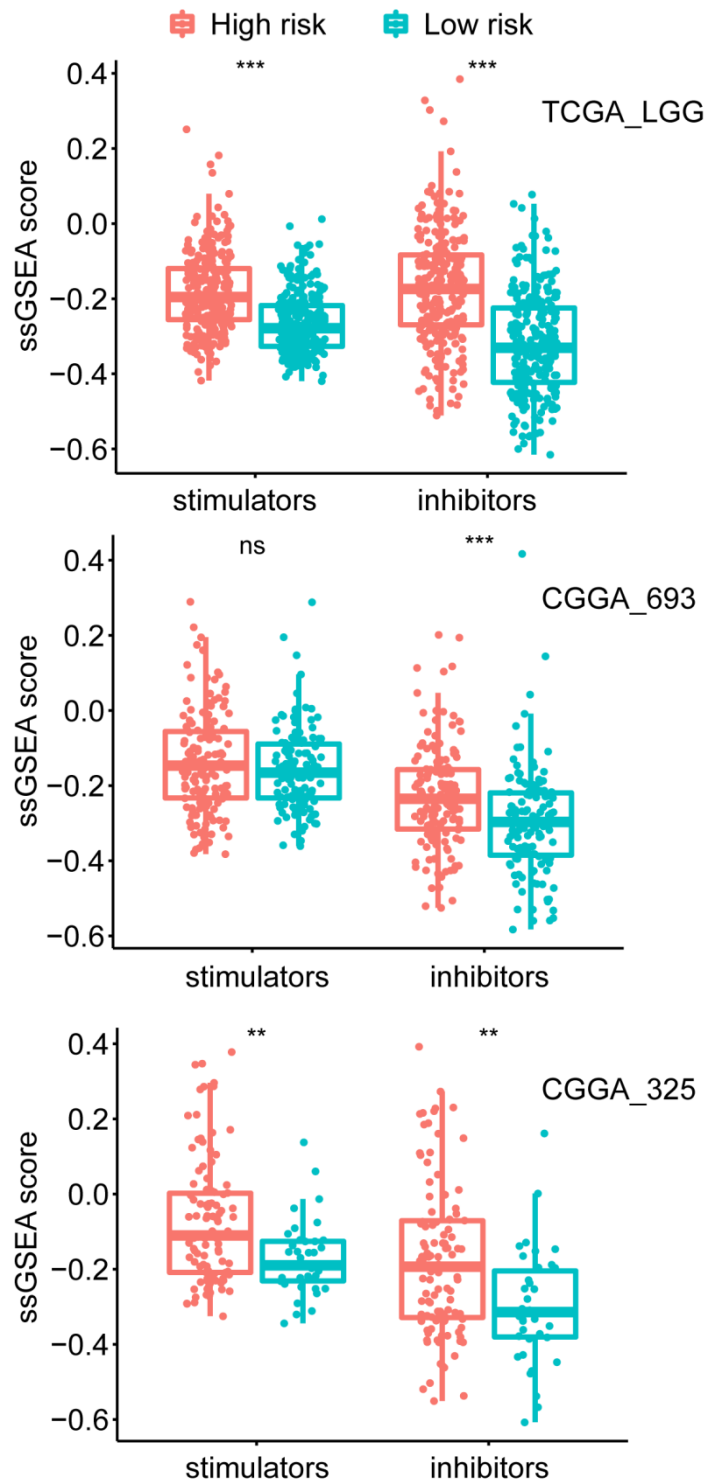

Figure S8. The differences of activities for immune stimulators and inhibitors in high-risk and low-risk groups from TCGA-LGG, CGGA-693, and CGGA-325 cohorts.

Table S1. The characteristic of datasets in this study.

Datasets	Sources	Platform	Samples
TCGA-LGG	TCGA	RNA-sequencing	511
CGGA-693	CGGA	RNA-sequencing	282
CGGA-325	CGGA	RNA-sequencing	144
GSE108474	GEO	microarray	162
E-MATB-3892	ArrayExpress	microarray	148

Table S2. Stemness gene sets used in this study.

Source	Catalogue	Numer of genes
StemChecker	GeneCards	133
StemChecker	Hs_EC_Skotheim	152
StemChecker	Hs_ES_CEC_Sperger	653
StemChecker	Hs_ESC_Assou	1066
StemChecker	Hs_ESC_Bhattacharya	89
