Procedure used to isolate, Identify and primary and secondary biochemical test used to identify the lactic acid bacteria

Table 1: Growth characteristics of lactic acid bacteria on selective Media and biochemical test

Tests	<i>Lactobacilli</i>	<i>Lactococci</i>	<i>Streptococci</i>	<i>Leuconostoc</i>	<i>Pediococcus</i>	<i>Bifidobacteria</i>
MRS	+	+	+	+	+	+
MRS+cysteine	+	+	+	+	+	+
M17	+	+	+	+	+	+
SL-Rogassa	+	+	+	+	+	+
Gram stain	+	+	+	+	+	+
properties	Rod Chains	Cocci In pairs and short chains	Cocci Long chains	Cocci Pairs	Cocci Pairs or tetrads	Rods Pleomorphic, filamentous
Catalase	-	-	-	-	-	-
Gas production from glucose	-	-	-	+	-	-
Incub.	20	-	+	-	+	+/_
T° test (°C)	35	+	+	+	+	+
	42	+	-	+	-	-
Glucose	+	+	+	+	+	+
Fructose	+	+	+	+	+	+
Maltose	+/-	+/-	+/-	+/-	+/-	+/-
Mannitol	+/-	+/-	+/-	+/-	+/-	+/-
Arabinose	+/-	+/-	+/-	+/-	+/-	+/-
Raffinose	+/-	+/-	+/-	+/-	+/-	+/-
Trehalose	+/-	+/-	+/-	+/-	+/-	+/-
Sucrose	+/-	+/-	+/-	+/-	+/-	+/-
Lactose	+/-	+/-	+/-	+/-	+/-	+/-
Dulcitol	+/-	+/-	+/-	+/-	+/-	+/-

Table 2: Selective culture media and conditions for enumeration and isolation of lactic acid bacteria.

LAB group	Media	T (°C)	Duration (h)	Incubation Condition
<i>Lactobacilli</i>	MRS	30	48-72	Aerobic
<i>Lactococci and Streptococci</i>	M17	37	48-72	Aerobic
<i>Lactobacillus</i>	SL Rogassa	37	48-72	Aerobic
<i>Bifidobacteria</i>	MRS+cysteine (0.5%)	30	48-72	Anaerobic

Table 3: Colony characteristics and bacterial count of isolated Lactobacillus from milk and milk product samples

Type of sample (Sample No.)	Media	Colony characteristics
Raw Milk (1)	MRS	Yellow to white smooth creamy circular
	M17broth+agar powder	Pink to white circular
	Rogassa + acetic glacial acid (1.3ml/L)	Pinpoint spindle yellowish white
	MRS+cysteine (0.5%)	Small creamy white circular
Raw milk (2)	MRS	White pinpoint
	M17	Small whitish yellow
	Rogassa	Medium white small circular colony
	MRS+cysteine	Large flat colony
Raw milk (3)	MRS	spindle pinpoint
	M17	white shiny mucoid large
	Rogassa	Small spindle white
	MRS+cysteine	Small circular white
Raw milk (4)	MRS	White small pinpoint
	M17	Large buttery
	Rogassa	Small to medium white
	MRS+cysteine (0.05%)	Small white creamy
Raw milk (5)	MRS	Small white circular colony
	M17	Grayish white large circular
	Rogasa	Small yellowish colony
	MRS+cysteine	White flat circular
Raw milk (6)	MRS	a. white creamy large circular b. small white pinpoint(spindle)
	M17	a. small yellowish pinpoint b. large white circular
	Rogasa	a. small white creamy circular b. yellowish spindle pinpoint
	MRS+cysteine	a. small whitish circular b. large creamy circular spindle c. yellowish mucoid
Raw Milk (7)	MRS	a. yellowish white circular

	Raw milk (7)	
	M17	b. small spindle pinpoint a. large yellowish creamy white circular b. small yellowish spindle
	Rogasa	a. Large white circular colony b. small yellowish spindle
	MRS+cysteine	a. small creamy white circular b. small tiny pinpoint
	MRS	White small circular colony
Yoghurt (1)	M17	a. large white b. medium to small white c. small white
	Rogasa	a. large creamy white b. small white circular
	MRS+cysteine	a. large mucoid shiny b. small white circular c. irregular shape colony
Yoghurt (2)	MRS	a. white creamy circular b. small pinpoint
	M17	small white pinpoint a. white creamy b. small grayish white
	MRS+cysteine	a. white large b. small white
Yoghurt (3)	MRS	a.smallspindle pinpoint b.small whitish grey
	M17	small pin-point colony
	Rogasa	a.white creamy circular b.small whitish grey
	MRS+cysteine	a.large white circular colony b.small pinpoint spindle
Yoghurt (4)	MRS	a.large white creamy circular b.small whitish spindle
	M17	a.white large circular b.small pinpoint
	Rogasa	a.white creamy circular b.yellowish white spindle
	MRS+cysteine	a. white creamy large circular b. small yellowish spindle

Yoghurt (5)	MRS	a. whitish creamy circular
	M17	b. small pinpoint spindle a.large yellow creamy circular
	Rogasa	b.small whitish spindle a.large white circular
	MRS+cysteine	b.yellowish spindle a.large yellowish creamy white
Cheese (1)	MRS	b.small white circular a.white small circular colony
	M17	b.spindle white grey c.yeast like colony
	Rogasa	a.white creamy small b.small pinpoint
	MRS+ cysteine	a.medium white colony b.small pinpoint
Cheese (2)	MRS	a.large white flat circular b.small white
	M17	a.large white circular b.small white circular
	Rogasa	a.white cottony circular b.small white colony
	MRS+ cysteine	white circular
Cheese(3)	MRS	a.white large circular b.small white
	M17	a.white large shiny round
	Rogasa	b.small white round
	MRS+cysteine	a.white large mucoid shiny round b.yellow fine spindle
Cheese (4)	MRS	a.large white round b.small white spindle
	M17	pinpoint grey spindle
	Rogasa	small yellow round
	MRS+cysteine	a. small grey Spindle

Table-4: Carbohydrates fermentation of lactic acid bacteria isolated from raw cowmilk, yoghurt and cheese in MRS media.

Sample. No.	Gram reaction	Catalase test	Glucose	Fructose	Maltose	Arabinose	Mannitol	Trehalose	Raffinose	Sucrose	Lactose	Dulcitol	BCP	Bacterial Morphology	Isolated presumptive genus
1	+	-	+	+	+	+	+	-	-	-	+	-	+	Rod	Lactobacilli
